

STATIONARY COMPACTORS

Five Commercial Models and Sizes Available

The Compactor that Sets the Bar

The ACE Equipment Company Stationary Compactors are designed from the ground up to deliver a lifetime of value and performance. Ace Stationary Compactors are designed using Slot & Tab construction - with interlocking structural stiffeners, Nylatron ram guides and only the finest quality American steel. Our BUILT TUFF / BUILT RIGHT approach ensures your compactor won't fail. Ever. Electrical and hydraulic components are chosen by their reliability, not price. Unlike our competitors who put margin before quality, our focus remains on the value we bring to our customers. ACE Equipment Company is also very pleased to offer equipment that reflects our commitment to great design and visual appeal. All of our Stationary Compactor models come with a custom, laser cut, Built-Tuff logo on the side and are available in a variety of colors to compliment the overall visual impact of the equipment.

ACE EQUIPMENT COMPANY STATIONARY COMPACTOR FEATURES

- No Limit Switches Ever
- Slot & Tab Construction
- PLC Driven for Improved Productivity
- Nylatron on Platen for Extended Life
- Optional Tongue & Groove Floor & Sides
- Optional Hardox 500 on Request
- We Say Yes to Custom Options*
- In-House Build Power Unit
- American-Made Electric Motor
- American-Made Hydraulic Cylinders
- Available in Almost Any Size
- **Every Compactor Rigorously Tested Prior to Delivery**
- Power Units Come Standard with Smart Features**

* Custom Chutes, Tipper
and Enclosures

** Cycle Status, Gate Open,
Tripped, etc.

Ace Stationary Compactor Overview

Perfect for:

- ✓ **Logistic Centers**
- ✓ **Distribution Centers**
- ✓ **OCC Recycling**
- ✓ **Dry Goods / Retail**
- ✓ **Industrial Plants**

- Rugged steel construction built for dependable daily operation
- Compact footprint is ideal for space-conscious installations
- Efficient hydraulic system delivers consistent compactor performance
- Heavy-duty ram and charge box construction for extended service life
- Smooth, quiet operation suitable for commercial/retail environments
- Simplified controls designed for operator convenience
- Low-maintenance hydraulics and simplified electrical systems reduce service calls

★ All Ace Stationary Compactors are designed with interlocking structural stiffeners, Nylatron® ram guides and only the finest American steel. Our attention to design and construction delivers a compactor that will not fail due to structural integrity.

★ Ace Equipment's power unit is 100% handcrafted at our Antigo, WI factory using only American-sourced motors and PLCs. No limit switches!

★ Precision laser cutting combined with slot & tab manufacturing processes ensure exact fit up and consistent critical tolerances.

★ Robotic welding technology delivers superior strength, consistency, and long-term dependability.

★ Ace Equipment compactors feature a one-piece seamless sidewall for longevity, corrosion resistance, and overall appearance.

★ All Ace compactors feature American made hydraulic cylinders for unmatched performance and value.

SLOT & TAB PRECISION

Why We Stand Out. Why It Matters.

OLD WORLD CRAFTSMANSHIP COMBINED WITH NEXT-GENERATION TECHNOLOGY

Ace Equipment Company, it starts with our 'Slot & Tab' assembly technique. Using the latest Mitsubishi computer-automated laser cutter, to achieve tolerances that no one else in the industry can offer. This allows us to deliver repeatable quality that ensures your Ace Equipment Company Transfer Compactor will continually exceed your expectations and deliver our customers with an ROI that no other manufacturer can match. Then we use a tongue & groove process to construct our floors to dramatically reduce the chance of debris getting behind the pack head or under the floor. No other compactor manufacturer builds their products like this, because it's more expensive and takes more time to manufacture. We don't operate that way - and we don't cut corners.

It's also reflected in our modern facility. One visit to our Antigo, Wisconsin factory and you'll understand. Like every piece of equipment we manufacture, our factory was purpose built to attract the finest artisans who work in a safe and inviting, well-lit facility enhanced with the latest technology to allow us to offer products constructed from 100% US-sourced steel, US-sourced hydraulic cylinders and hydraulic motors. No other compactor manufacturer can make that claim. Take a good look at any Ace Equipment Company product and you'll see that we've overbuilt it because we know you won't under use it. That is part of BUILT TUFF - BUILT RIGHT philosophy.
